

# POWERING POSSIBILITIES

Reliable Power Conversion  
Products & Accessories

**Progressive  
Dynamics, Inc.**

[www.progressivedyn.com](http://www.progressivedyn.com)

# WHY PROGRESSIVE? WHAT WE OFFER

## Recreational Vehicle Products

Recreational Vehicle power conversion and battery charging products enhanced by our **Charge Wizard® 4-stage battery management system**. This management system constantly monitors voltage status and automatically manages your battery. Accessories are also available.

## Specialty Products

Specialty products from Progressive Dynamics, Inc. are suited for various specialty vehicles and other applications for a range of industries.

## Marine Products

A complete range of Marine battery chargers from 40-60-80 Amps. Features a digital display screen, plus a unique microprocessor controlled four-stage charging system that offers rapid recharge and two to three times longer battery life.

## About Progressive Dynamics, Inc.

Progressive Dynamics, Inc. is a privately owned corporation, established in Marshall, Michigan, in 1964.

**Today, PDI produces a full line of products for the RV, marine and specialty industries. No matter the product, at PDI you receive superior quality and customer service. Our product's are designed, assembled, tested, warranted and serviced in the U.S.A.**

## Tired of Replacing Batteries?

### DON'T LET THIS HAPPEN TO YOUR CUSTOMERS!

Customer complaints are "history" when installing a Progressive Dynamics converter with the automatic 4-stage Charge Wizard® system. The Charge Wizard has been shown to increase battery life by 2 to 3 times or more.

Our Charge Wizard 4-stage system uses microprocessor technology to add intelligent charging capability. It constantly monitors the battery and automatically adjusts the converter output voltage based on the battery's charge status. Designed to eliminate battery over & under charging problems associated with most other battery chargers and provide rapid yet safe battery recharging.

The Charge Wizard constantly monitors battery voltage and battery usage then selects one of the following four operating modes to properly charge and maintain the battery.

#### BOOST MODE

14.4 Volts - Rapidly brings the battery up to 90% of full charge.

#### NORMAL MODE

13.6 Volts - Safely completes the charge.

#### STORAGE MODE

13.2 Volts - Maintains charge with minimal gassing or water loss.

#### EQUALIZATION MODE

14.4 Volts - Every 21 hours for a period of 15 minutes helps prevent battery stratification & sulfation - the leading cause of battery failure.

## PDI PLUS LIFETIME EXTENDED WARRANTY

Your converter is covered by a two year limited warranty against defects in material or workmanship. This standard warranty begins on the date of the original purchase of your recreational vehicle\boat.

**You can EXTEND THE LIMITED TWO YEAR WARRANTY on your converter for PDI PLUS LIFETIME WARRANTY for an additional charge by registering your converter.**

The Charge Wizard technology is built into our PD4000, PD4100, PD4500, PD4600 and PD9200 series converters/chargers. The Charge Wizard is also available as a pendant (as shown on the right). This allows easy field upgrade to your PD9100 series deck mount converter/charger by simply plugging the pendant into the built-in TCMS® connector located just above the fuses on the output panel.

#### RETAIL DISPLAY PACKAGE

Colorful graphics grab attention and the large window shows the product. The package is designed for pegboard or slatwall display.

# INTELI-POWER® 1600 PURE SINE WAVE SERIES INVERTERS

## NOW AVAILABLE!

The All-New Intelli-Power 1000 Watt Pure Sine Inverter

**MODEL NO.: PD1610, PD1610-J**

### FEATURES:

- Reverse battery protection
- Thermally controlled fan speed
- Unit can be monitored by remote control
- Auto Restart after power interrupt
- Easy AC hardwire hookup
- Remote included
- Conforms to UL STD 458, Certified to CSA STD C22.2 No. 107.1
- DC lug connection
- Unit weight: 7 lbs
- Unit dimensions: 11.2 x 6.7 x 4.0
- 1,000 watt continuous power
- 2,000 watt peak power
- Pure Sine Wave

**MODELS: PD1610, PD1610-J**

### PHYSICAL SPECIFICATIONS

Weight: 7 lbs

Dimensions: 11.2" x 6.7" x 4.0"

### ELECTRICAL SPECIFICATIONS

Surge Power (peak): 2000 Watt

AC Output Voltage: 120 Volts AC +/-2%

Optimum Efficiency: >90%

AC Pass-Through Current: 15A (no breaker required)

DC Input Current: 100 Amps at full power output

### ELECTRICAL CONNECTIONS

DC Connections: DC Lugs (no expensive ring terminal required)

AC Connections: Vertical push-in connections only (no GFCI)

AC Knockouts: Removable by hand

### ELECTRICAL PROTECTION

Reverse Battery Protection: Full Reverse Battery Protection

Over Temperature Restart: Yes

Adjustable DC Under Voltage: No

DC Under Voltage Warning: Flashing Indicator, at 11.5 Volts DC

### DIGITAL DISPLAY

Remote Control Panel: Full control (same as on-board control)

Remote Control Location: Up to 50' wired connection

Display Data: Volts In, Volts Out, Power Out, Error Codes, Sleep

Display Indicators: Low Bat Warning, Fault, Shore

Display Sleep Mode: After 30 seconds, Display off, Power Dims

RV-C Compatible: Yes

### MISCELLANEOUS FEATURES

Pure Sine Wave: 1000 Watt

Fan Control: 120 Volts AC +/-2%

Auto-Restart: 20A (no breaker required)

Built-In Transfer Switch: 20 Amps @ 95-135 VAC

# INTELI-POWER® PD1600 PURE SINE WAVE INVERTERS

**MODEL: PD1618**

**MODEL NO.: PD1618**

## FEATURES:

- Reverse battery protection
- Thermally controlled fan speed
- Unit can be monitored by remote control
- Auto Restart after power interrupt
- Easy AC hardwire hookup
- Remote included
- Conforms to UL STD 458, Certified to CSA STD C22.2 No. 107.1
- DC lug connection
- Unit weight: 11 lbs
- Unit dimensions: 15" x 7.9" x 4.0"
- 1800 watt continuous power
- 3600 watt peak power
- Pure Sine Wave

## PHYSICAL SPECIFICATIONS

Weight: 11 lbs

Dimensions: 15" x 7.9" x 4.0"

## ELECTRICAL SPECIFICATIONS

Surge Power (peak): 3600 Watt

AC Output Voltage: 120 Volts AC +/-2%

Optimum Efficiency: >90%

AC Pass-Through Current: 20A (no breaker required)

DC Input Current: 180 Amps at full power output

## ELECTRICAL CONNECTIONS

DC Connections: DC Lugs (no expensive ring terminal required)

**"MIGHTY MINI" THE COMPACT ALL-IN-ONE SYSTEM...  
AC/DC DISTRIBUTION PANEL AND INTELI-POWER CONVERTER.**

## FEATURES:

Industry's smallest all-in-one 45 or 60 Amp distribution panel/converter system. Available with our exclusive built-in Intel-Power Converter...

***"The most reliable converter in the RV industry."***

- The converter section is easily accessible from the front.
- AC Distribution Panel is rated for 120 VAC @ 30 Amps with up to 7 branch circuits.
- The DC section has 12 branch fuse holders, two wired to accommodate 30 Amp fuses, ten more with a maximum rating of 20 Amps each. All wire tail connections.
- Exclusive DC disconnect tie in.
- Reverse battery blown fuse indicator.

### Retail Models:

PD4045KV & PD4060KV

## OTHER FEATURES:

- Reverse battery protection
- Electronic current limiting
- High and Low AC input protection
- Intelligent, variable speed, cooling fan
- Automatic thermal protection
- Press open door for easy access to circuit breakers
- Front access to large wiring compartment

1<sup>ST</sup> WITH  
LITHIUM  
SWITCH & WAGO

THE ULTIMATE ALL-IN-ONE 240V INPUT VOLTAGE,  
50 AMP AC/DC DISTRIBUTION PANEL

## INTELI-POWER AC FEATURES:

- The AC Distribution Panel is rated for 240V input voltage at 50 Amps.
- Provisions for up to 12 branch circuit breakers plus a center feed dual 50 Amp main breaker (not included).
- 12 built-in push and lock strain relief wiring connectors make installation quick and easy and saves over 50% on installation costs.
- Attractive lightweight panel design made from black impact-resistant high temperature polymers.

## INTELI-POWER DC FEATURES:

- Top ten fuse holders recommended for low current devices such as smoke and carbon monoxide detectors.
- 18 branch fuse holders with 4-30 Amp circuits. Maximum rating 20 Amps on remaining circuits – available with terminal blocks .
- LED indicators identify which fuse is blown.
- Converter/Charger section is accessible from the front.
- Converter/Charger ratings of 60, 75 and 90 Amps.
- Easy access reverse battery protection fuses.
- DC disconnect tie in.

## OTHER FEATURES:

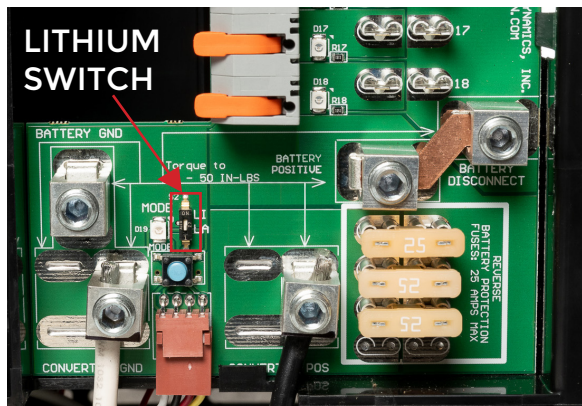

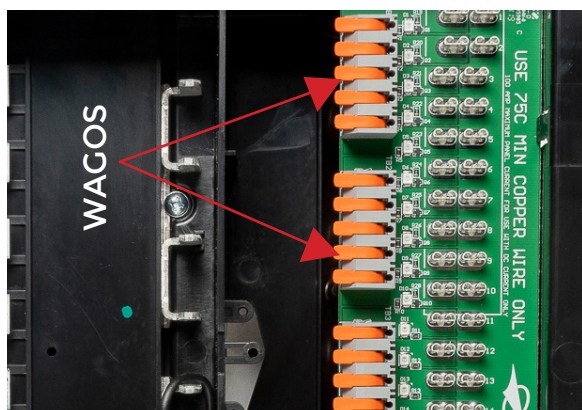

- Reverse battery protection
- Electronic current limiting
- High and Low AC input protection
- Intelligent, variable speed, cooling fan
- Lead Acid/ Lithium Switch is NEW feature
- Automatic thermal protection
- Press open door for easy access to circuit breakers
- Front access to large wiring compartment
- Optional DC Ground Buss can be user installed in the DC wiring compartment.

14.4 VDC, 45 Amp

**Dimensions:**

8.25"L x 7.25"W x 4.7"H

**Weight:**

4.5 lbs.

## STANDARD FEATURES ON ALL MODELS:

- Equipped with 15 Amp electrical cord. (with the exception of the 80 Amp models)
- Built-in Charge Wizard constantly monitors voltage status and automatically manages your battery.
- Built-in accessory port for optional Pendant (standard on retail units) to monitor Charge Wizard operating modes.
- Reverse battery protection protects converter from damage resulting from improper (reverse) battery lead connection.
- These solid-state converter/chargers deliver filtered DC power for safe and reliable service.
- Electronic current limiting automatically reduces output voltage when maximum capacity is reached. Protects your investment and offers peace of mind.
- Variable speed intelligent cooling fan automatically monitors converter temperature and activates fan at speed required. Very slow quiet speeds are used when demand is low such as during sleeping hours.
- High voltage protection protects converter from spikes or surge of voltage over 135V.
- Automatic thermal protection reduces converter output to safe levels when unit temperature exceeds pre-set limits and protects converter from damage due to excessive heat.
- 2 year limited warranty.

Built-in Charge Wizard constantly monitors voltage status and automatically manages your battery. Intelli-Power 9200 Series models can recharge the battery to 90% in 3-6 hours using our Charge Wizard technology.

## 25 & 40 AMP POWER CONVERTER/ BATTERY CHARGER

**Intel-Power 9200® Series Power Converter/  
Battery Charger for Specialty Vehicles and Other  
Applications with Built-in, 4-Stage Charging for  
Better Battery Management**

Provides 24 Volt output in either a 25 Amp or 40 Amp configuration. Typical applications include battery charging for shuttle buses, local refrigeration delivery trucks, display vans, emergency vehicles, communication trucks, over-the-road trucks with sleeper cabs, and solar energy.

### STANDARD FEATURES:

- Built-in Charge Wizard®, 4-stage charging system constantly monitors batteries and automatically adjusts your converter output voltage based on the battery's charge status.
- Made in America for better quality, service and support.
- Reverse battery protection protects converter from damage resulting from improper (reverse) battery lead connection.
- Electronic current limiting automatically reduces output voltage when maximum capacity is reached.
- 2 year limited warranty.

### SPECIFICATIONS:

PD9240-24A*	
Input:	105-130 VAC, 50/60 Hz, 1300 Watts
Output:	27.2 VDC, 40 Amp
Dimensions:	9.15"L x 7.38"W x 3.6"H
Weight:	7.5 lbs

PD9225-24	
Input:	105-130 VAC, 50/60 Hz, 900 Watts
Output:	27.2 VDC, 25 Amp
Dimensions:	8.25"L x 7.25"W x 4.7"H
Weight:	4.5 lbs.

\*Plugs into a 20 Amp outlet. Removal or alteration of converter 20 Amp power cord will void warranty.

# INTELI-POWER® 9100L SERIES

DESIGNED TO MEET STRINGENT VOLTAGES REQUIRED FOR  
PROPERLY CHARGING & MAINTAINING LITHIUM ION BATTERIES

## ENGINEERED FOR POWER-HUNGRY APPLICATIONS

25, 30, 40, 45, 60, 70 & 80 Amp Models Available

### STANDARD FEATURES ON ALL MODELS:

- Reverse battery protection protects converters from damage resulting from improper (reverse) battery lead connection.
- Units deliver filtered DC power to the Lithium Ion Batteries to ensure their built-in electronic balancing circuits operate properly.
- Electronic current limiting automatically reduces output voltage when maximum capacity is exceeded. Protects your investment.
- Low line voltage protection automatically shuts converter down if input voltage is insufficient.
- Variable speed intelligent cooling fan automatically monitors converter temperature and activates fan at speed required.
- High voltage protection protects converter from spikes or surge of voltage over 135V.
- Automatic thermal protection reduces converter output to safe levels when unit temperature exceeds pre-set limits and protects converter from damage due to excessive heat.
- Output Voltage can be FACTORY ADJUSTED to meet OEM requirements for various Lithium Ion Battery chemistries and voltages. Standard "L" series voltages are set for 14.6/28.55 volts to meet requirements for Lithium Iron Phosphate Batteries. Other chemistries may require different voltages.
- The PD9100L Series can be wired in parallel to charge at much higher current rates. They can also be wired in series/parallel to charge 36, 48, 60, 72 and higher voltage battery packs at high charge rates.
- 2 year limited warranty.

### Lithium Ion Batteries require special balancing circuits and chargers!

12-Volt Lithium Ion Batteries are composed of 4 cells, each with a voltage rating of 3.2-volts wired in series providing a total output of 12.8 Volts. Lithium Iron Phosphate type cells are the safest and most common type used, however, they must never be charged to a voltage over 4-Volts and must never be discharged below 2-volts, or they will be damaged.

Due to manufacturing inconsistencies, each Lithium Ion Cell is different (i.e. they will each charge and discharge at different rates). These cell differences make recharging Lithium Batteries fairly complex and requires that the battery manufacturer install electronic balancing circuits inside the battery to prevent overcharging a cell, or discharging too much. While these balancing circuits protect the cells, they can increase recharge times, depending on the mix of cells in each 12-volt battery pack. This increase in recharge time is especially apparent in higher voltage and or higher current battery packs. Lithium Ion Batteries also require battery chargers that can produce a higher voltage than provided by standard 12-volt or 24-volt lead/acid battery chargers. Trying to recharge a Lithium Ion Battery with a standard lead/acid charger will result in a partially charged battery and **MAY REDUCE BATTERY LIFE!**

# INTELI-POWER® 9100L SERIES

## 80 AMP

**MODEL PD9180ALV**

**Input:** 105-130 VAC 50/60 Hz. 1300 Watts

**Output:** 14.6 Volts VDC 80-Amps

**Dimensions:** 9.15"L x 7.38"W x 3.6"H

**Weight:** 7.5 lbs.

Plugs into a 20 Amp outlet. Removal or alteration of converter  
20 Amp power cord will void warranty.

## 60 AMP

**Model PD9160ALV**

**Input:** 105-130 VAC 50/60 Hz. 1000 Watts

**Output:** 14.6 Volts VDC 60-Amps

**Dimensions:** 9.15"L x 7.38"W x 3.6"H

**Weight:** 5.8 lbs.

## 45 AMP

**Model PD9145ALV**

**Input:** 105-130 VAC 50/60 Hz. 725 Watts

**Output:** 14.6 Volts VDC 45-Amps

**Dimensions:** 8.25"L x 7.25"W x 4.7"H

**Weight:** 4.5 lbs.

## 40 AMP

**Model PD9140-24ALV**

**Input:** 105-130 VAC 50/60 Hz. 1,300 Watts

**Output:** 28.55 Volts VDC 40-Amps

**Dimensions:** 9.15"L x 7.38"W x 3.6"H

**Weight:** 7.5 lbs.

Plugs into a 20 Amp outlet. Removal or alteration of converter  
20 Amp power cord will void warranty.

## 30 AMP

**Model PD9130LV**

**Input:** 105-130 VAC 50/60 Hz. 500 Watts

**Output:** 14.6 Volts VDC 30-Amps

**Dimensions:** 8.25"L x 7.25"W x 4.7"H

**Weight:** 4 lbs.

## 25 AMP

**Model PD9125-24LV**

**Input:** 105-130 VAC 50/60 Hz. 900 Watts

**Output:** 28.55 Volts VDC 25-Amps

**Dimensions:** 8.25"L x 7.25"W x 4.7"H

**Weight:** 4.5 lbs.

# INTELI-POWER® 2100 SERIES

## PD2100 SERIES ELECTRONIC MARINE CONVERTER/CHARGERS WITH FOUR-STAGE CHARGING SYSTEM

### STANDARD FEATURES:

- Four-Stage Charging System - Microprocessor constantly monitors battery voltage and automatically selects one of the four charging modes: BOOST, NORMAL, STORAGE or EQUALIZE.
- 3 Diode Isolated Outputs - Allows the Converter/Charger to charge three separate banks of batteries. Each output is capable of handling the full rated current of the charger.
- Reverse Battery Protection - Prevents Converter/Charger from being damaged if the batteries are accidentally connected to the charger in reverse.
- Over and Under Voltage Protection - Prevents high voltage spikes and brownouts from damaging the Converter/Charger.
- Electronic Current Limiting - Limits the output current to the maximum rating of the charger to prevent over heating and damage caused by shorts or excessive loads.
- Variable Speed Intelligent Cooling Fan - Only runs as fast as required to maintain a more constant operating temperature inside the Converter/Charger. This feature reduces thermal stress caused by fans that cycle on and off.
- Programmable in the Field - PD2100 Series Intelli-Power Converter/Chargers are programmable in the field to provide optimum charging profiles for lead-acid, gel-cell or AGM batteries. See illustration on next page.
- Automatic thermal protection - reduces converter output to safe levels when unit temperature exceeds pre-set limits and protects converter from damage due to excessive heat.
- Series or Parallel Connection - Intelli-Power Converter/Chargers can be connected in series to provide a combination 12/24 Volt system or in parallel to provide more current.

MEMBER  
**ABYC**  
Setting Standards for Safer Boating

**RETAIL DISPLAY PACKAGE**

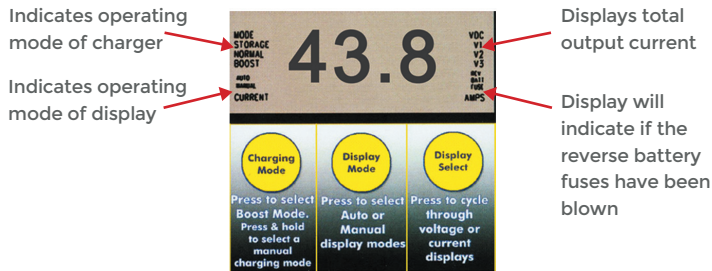

# INTELI-POWER® 2100 SERIES

## Converter/Charger Operating Status

### DIGITAL DISPLAY SCREEN

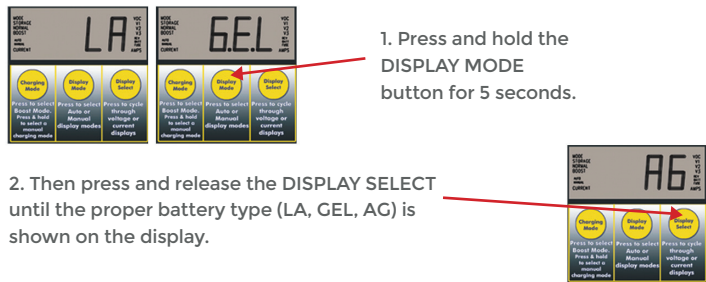

Meter displays output voltage for all three outputs.  
With power off, it displays actual battery voltages.

Digital Meter Displays: Current, Voltage, Operation Mode, Blown Fuse Indication, and Battery Type.

In-the-field programming the PD2100 Series for battery type is easy. Program ensures proper charge profile for lead-acid, gel-cell, or AGM batteries. Also has built-in self-test.

#### CHANGE BATTERY TYPE AS FOLLOWS:

**Microprocessor-controlled four stage charging system provides rapid recharge and long battery life.**

The Intelli-Power Four-Stage Charging System – Provides optimum charging voltage at all times during the recharge cycle. Battery voltage is constantly monitored by the microprocessor, which automatically selects one of four operating modes:

**BOOST MODE** – Selected whenever the battery voltage is very low. Boost Mode provides a higher charging voltage to rapidly bring the battery up to 90% of full charge. The digital display will read BOOST when the charger is in this mode.

**NORMAL MODE** – Automatically selected once the battery reaches the 90% charged level. This lower voltage safely completes the charge and remains in this mode as long as the 12 Volt systems in the boat are being operated. The digital display will read NORMAL in this mode.

**STORAGE MODE** – Activated automatically when the 12 Volt systems are turned off and the battery has been fully charged for a period of 30 hours. The digital display will read STORAGE when in this mode.

**\*Exclusive! Equalize Mode** – Helps prevents battery stratification and power-robbing sulfation. When in the Storage Mode, the microprocessor automatically equalizes the battery by increasing the voltage from 13.2 Volts to 14.4 Volts for approximately 15 minutes every 21 hours. This remixes the electrolyte mixture of water and sulfuric acid. Battery manufacturers recommend that

\*NOTE: Gel-Cell and AGM batteries do not require an Equalize Mode.

## 80, 60 AND 40 AMP MODELS AVAILABLE

### 80 AMP

OEM/Retail PD2180V

Input: 105-130 VAC, 50/60 HZ,  
1300 Watts

Dimensions: 15.2"L x 7.8"W x 4.2"H  
Weight: 9.2 lbs.

### 40 AMP

OEM/Retail PD2140V

Input: 105-130 VAC, 50/60 HZ,  
650 Watts

Dimensions: 10.9"L x 7.8"W x 4.2"H  
Weight: 5.9 lbs.

### 60 AMP

OEM/Retail PD2160V

Input: 105-130 VAC, 50/60 HZ,  
1000 Watts

Dimensions: 10.9"L x 7.8"W x 4.2"H  
Weight: 6.4 lbs.

# 5100 & 5200 SERIES

SCREW TYPE WIRING TERMINALS ENSURE EASE OF WIRING AND PREVENTS WIRING ERRORS

## 5100 SERIES AUTOMATIC TRANSFER SWITCH

### FEATURES:

- Quick change circuit board is easily replaced in the event of failure. No need to disconnect and reinstall the entire unit.
- Time delay feature ensures generator voltage is at a stable level before transfer occurs.
- Built-in strain reliefs allow the installer to simply push the branch circuit wires inside the unit for connection.
- Eliminates the need to purchase and install separate strain reliefs for each circuit.
- 2 year limited warranty.
- U.S. Patents: RE40,354; 6,430,036.

**Retail Model: PD5110010QV**  
**OEM: PD5110010Q**

120 VAC, 30-Amps Pig tail AC wire connections and Wagos Quick Flip Connectors  
Dimensions: 9.25"L x 7.28"W x 4.2"H  
Weight: 2.5 lbs.

## 5200 SERIES AUTOMATIC TRANSFER SWITCH

### FEATURES:

- Rugged, heavy duty, screw type wiring terminals ready to wire to contactor base. Ensure ease of wiring and prevents wiring errors.
- Time delay circuit board ensures generator voltage is at a stable level before transfer occurs.
- Easy to remove protective cover with wiring schematic inside.
- 70 Amp neutral rating.
- 2 year limited warranty.

**Retail Model PD52V**  
**OEM Model PD52**

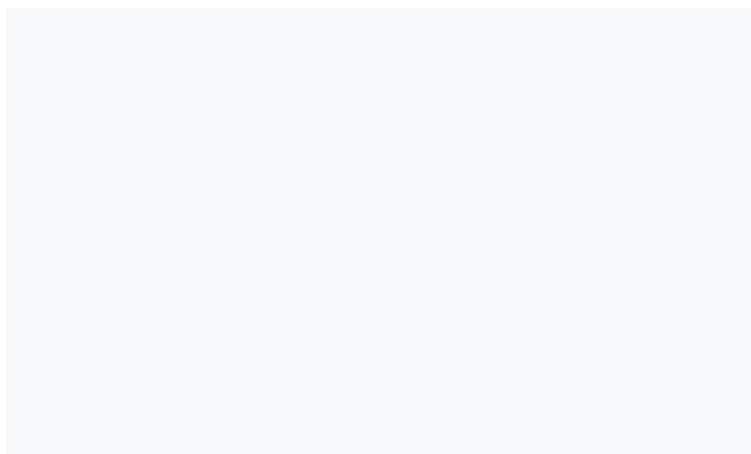

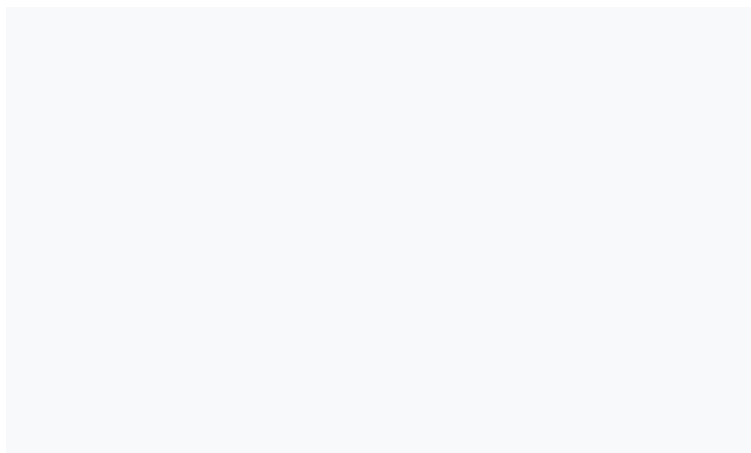

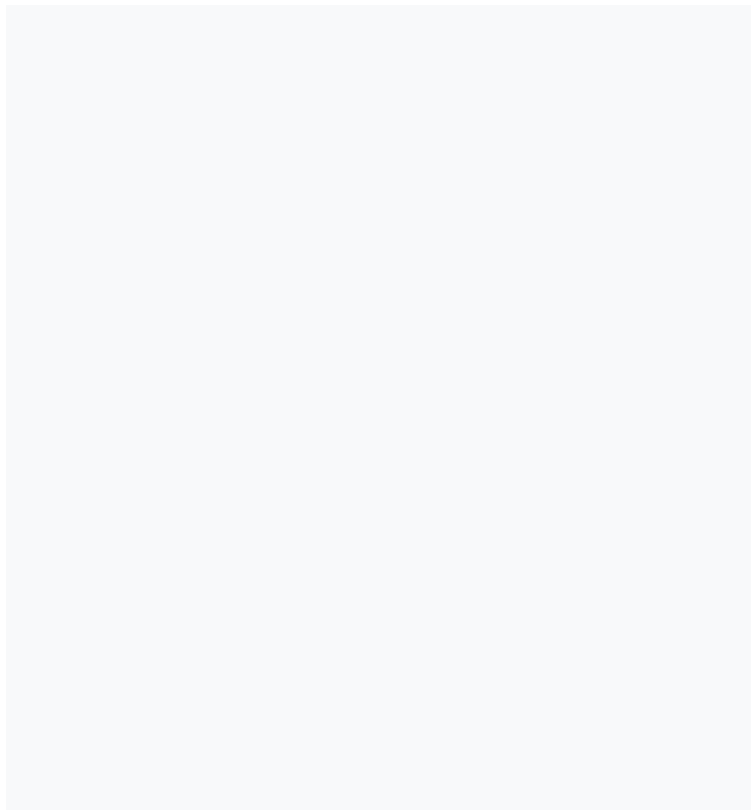

240 VAC, 50 Amps

Metal Box Dimensions: 10.38"L x 6.88"W x 4.5"H

Weight: 7 lbs.

PROGRESSIVE DYNAMICS, INC. ARE  
SUITED FOR VARIOUS RV, SPECIALTY  
VEHICLES, MARINE APPLICATIONS  
AND OTHER APPLICATIONS FOR A  
WIDE RANGE OF INDUSTRIES.

# 5000 SERIES AC/DC DISTRIBUTION PANEL

ATTRACTIVE, COMPETITIVELY PRICED CONTROL CENTER THAT FITS YOUR ELECTRICAL INSTALLATION COST REQUIREMENTS

## FEATURES:

- Provisions for 30 Amp AC main and up to 9 AC branch circuits.
- Generous wiring space for easy installation – also reduces costly wiring errors.
- Built-in wire strain relief for each branch circuit. Saves over 50% on installation costs.
- Space for up to 12 fused DC branch circuits for 12 Volt lighting and DC appliance circuits.
- Accepts rated fuses up to 30 Amp – eliminates auxiliary fuse panels for slide-outs and leveling jacks saving you even more money.
- Attractive lightweight panel design made from black impact-resistant high temperature polymers.
- All 12 VDC branch circuit connections located on outside rear of panel – reducing installation time and costly errors.
- High current 12 VDC input power terminal strip provides easy connection point for battery and converter.

## AVAILABLE OPTIONS:

(Specify options when ordering)

- 120 VAC, 15 Amp outlet available for power converters and other AC appliances.
- 11 terminal negative 12 VDC buss bar provides common connection point for all DC circuit negative wires.

### Connector type must be specified:

- 12 VDC screw-type circuit terminals.
- 12 VDC 1/4" tab connectors.

### Measurements and Weight\*:

Dimensions: 13.4"W x 7.1"H x 4.0"D

Cut-out size: 12.25"W x 5.875"H

Weight: 1.45 lbs.

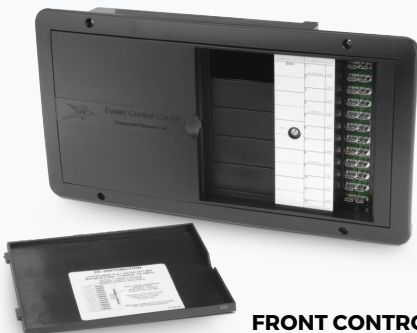

\*Retail and OEM Part Numbers will be determined by your selected options when you place your order.

INSIDE WITH FULL FRONT COVER OFF

REAR VIEW SHOWING SCREW CONNECTIONS

FRONT CONTROL PANEL -  
ACCESS COVER REMOVED

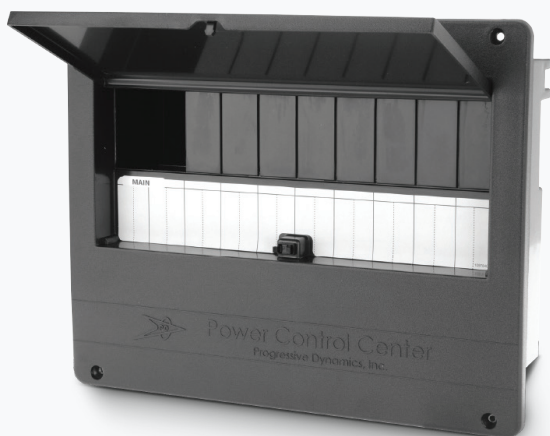

# 5500 SERIES AC DISTRIBUTION PANEL

**VERSATILE! CAN BE TWO PANELS IN ONE  
TO SAVE COST AND SPACE**

## FEATURES:

- A split 50/30 panel accepts – LEFT SIDE: dual 50 Amp main and up to 10 branch circuits – RIGHT SIDE: 30 Amp main and up to 4 branch circuits.
- A split 50/50 panel accepts – LEFT SIDE: dual 50 Amp main and up to 8 branch circuits – RIGHT SIDE: dual 50 Amp main and up to 4 branch circuits.
- A split 30/30 panel accepts – LEFT SIDE: 30 Amp main and up to 8 branch circuits – RIGHT SIDE: 30 Amp main and up to 8 branch circuits.
- Special order configurations available on request.
- Compatible with 6000 Series DC Power Distribution Panel.
- Press open door for easy access to circuit breakers.
- AC Panel features 12 built-in push and lock strain relief connectors.
- Attractive lightweight panel design made from black impact-resistant high temperature polymers.
- AC Panel designed with large front wiring compartment.

**PRESS OPEN CIRCUIT BREAKER ACCESS DOOR**

## AVAILABLE OPTIONS:

(Specify options when ordering)

- Optional 15 Amp/120 VAC outlet on rear of AC Panel

### Measurements and Weight\*:

Dimensions: 11.7"W x 9.2"H x 4.1"D

Cut-out size: 10.5"W x 7.5"H

Weight: 2 lbs.

\*Retail and OEM Part Numbers will be determined by your selected options when you place your order.

**MOUNT VERTICAL OR HORIZONTAL**

**12 BUILT-IN STRAIN-RELIEF  
WIRING CONNECTORS**

# 6000 SERIES

DC POWER DISTRIBUTION PANEL COMPATIBLE WITH  
5500 SERIES AC POWER DISTRIBUTION PANEL

## FEATURES:

- Can be mounted vertically or horizontally.
- Holds up to 18 ATC-type fuses rated for up to 30 Amps.
- DC Panel has 2 built-in 12 Volt positive power terminals for connecting battery and converter positive wires.
- Attractive lightweight panel design made from black impact-resistant high temperature polymers.

COVER OPEN, SHOWN WITH OPTIONAL LED

OPTIONAL 1/4" TAB CONNECTORS

## AVAILABLE OPTIONS:

(Specify options when ordering)

- 12 Volt DC output connectors available as either 1/4" tab connectors rated 30 Amps max., or screw-type rated 20 Amps max.
- 18 fuse holder with 15-position ground bus bar.
- LED indicators alert to blown fuse.

**Measurements and Weight\*:** (Flush mount)

**Dimensions:** 4.25"W x 9.25"H x 2.0"D

**Cut-out size:** 3.5"W x 7.5"H

**Weight:** 1 lbs.

\*Retail and OEM Part Numbers will be determined by your selected options when you place your order.

Since 1964, Progressive Dynamics, Inc. has been the source of bright ideas for the Recreational Vehicle and Marine Industries

# MAKING A DIFFERENCE THROUGH INNOVATION AND DEPENDABILITY

## WARRANTIES AND REFUNDS

- LIMITED WARRANTY:** Progressive Dynamics, Inc. warrants its products to be free from defects in material or workmanship under normal use and service; and limits the remedies to repair or replacement.
- DURATION:** This warranty is valid only within North America and shall extend from the original date of retail purchase for the period specified below.  
**Marine Battery Converter:** 2 Years; **Power Converters:** 2 Years;  
**Distribution Panels:** 2 Years; **Transfer Relays:** 2 Year;
- WARRANTY EXCLUSIONS:** This warranty specifically does not apply to:
  - Any product which has been repaired or altered in any way by an unauthorized person or service station;
  - Damage caused by excessive input voltage, misuse, negligence or accident; or an external force;
  - Any product which has been connected, installed or adjusted or used other than in accordance with the instructions furnished, or has had the serial number altered, defaced or removed;
  - Cost of all services performed in removing and reinstalling the product; and
  - ANY LOST PROFITS, LOST SAVINGS, LOSS OF USE OF ENJOYMENT OR OTHER INCIDENTAL DAMAGES ARISING OUT OF THE USE OF, OR INABILITY TO USE, THE PRODUCT. THIS INCLUDES DAMAGES TO PROPERTY AND, TO THE EXTENT PERMITTED BY LAW, DAMAGES FOR PERSONAL INJURY. THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.
- PROOF OF PURCHASE:** A warranty claim must be accompanied by proof of the date of purchase. This may be in the form of a dealer Bill-of-Sale/Invoice, store receipt, or new vehicle title. No prior registration of the converter is necessary to start the standard warranty.
- CLAIM PROCEDURE:** Upon discovery of any defect, Progressive Dynamics, Inc. shall besupplied the following information by mail, telephone, fax or email.
  - Name and address of the claimant
  - Name, model and serial number of the product
  - Application in which product was installed. (Includes manufacturer, model and model year where applicable)
  - Date of purchase
  - Complete description of claimed defect

Upon determination that a warranty claim exists (a defect in material or workmanship occurring under normal use and service,) the product shall be shipped postage prepaid to Progressive Dynamics, Inc. together with proof of purchase. The product will be repaired or replaced and returned postage prepaid.

## SERVICE DEPARTMENT

Address	: 507 Industrial Road, Marshall, MI 49068
Telephone	: 269-781-4242
ServiceDept. Fax	: 269-781-8729
E-mail	: service@progressivedyn.com
Service Hours	: 8:30 A.M. to 4:30 P.M. Eastern Standard Time

**PDI PLUS EXTENDED  
LIFETIME WARRANTY THAT  
CAN BE PURCHASED FOR  
AN ADDITIONAL COST.**
